DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7 and 23-32, drawn to a product, classified in class 428, subclass 66.6.
- II. Claims 8-14 and 33-44, drawn to a process, classified in class 118, subclass 728.
- III. Claims 15-22, drawn to a process, classified in class 427, subclass 446.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product can be attached to an automobile and used as a brake.

3. Inventions III and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process can be used to make a different product such as a disk with only one channel.

4. Inventions II and III are related as process of use and process of making a product. The inventions are distinct since they are directed to different processes capable of supporting separate patents.
5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
6. During a telephone conversation with Mr. Gagnebin on September 20, 2004 a provisional election was made with traverse to prosecute the invention of Group II, claims 8-14 and 33-44. Claims 1-7 and 15-32 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

EXAMINER'S AMENDMENT

7. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Gagnebin on November 1, 2005.

The application has been amended as follows:

In the specification: on page 3, line 33, the term "includes" has been deleted; and in line 34, the term -- include -- has been inserted after "to".

In the claims: claims 1-7 and 15-32 have been deleted.

8. The following is an examiner's statement of reasons for allowance: the prior art fails to teach or suggest a process of preparing performs for chemical vapor infiltration comprising stacking a plurality of carbon performs with annular shim members therebetween wherein the shim members define a plurality of radially extending flow paths for communicating the interior of the stack with the exterior of the stack in combination with all of the other limitations of claims 8 and 33.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alexander Thomas whose telephone number is 571-272-1502. The examiner can normally be reached on 6:30-4:00 M-THUR.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Harold Pyon can be reached on 571-272-1498. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
